 Wahal

 MrinalWahal[at]gmail[dot]com

 Remote | Delhi, India

INTERESTS

- Backend Engineering
- Developer Experience
- Golang
- Artificial General Intelligence
- Philosophy
- Deep Learning

SKILLS

- Microservices, APIs
- Language agnostic
- DevOps, CI/CD, Containerization
- Leadership, Communication, Problem Solving, Teamwork

LECTURES/TALKS | +15 MORE

Artificial Neural Networks

IIT Madras Research Park, Chennai

Security Engineering

Anna Centenary Library, Chennai

Machine Learning

IIT Madras Research Park, Chennai

Ethical Hacking

Madras Institute of Technology, Anna University, Chennai

EDUCATION

Bachelors in Technology

Computer Science & Engineering

EXPERIENCE

Nhost.io, Stockholm | 9 Months | [Link](#)

Stack: Golang, AWS, GitHub Actions, Docker

- Second core team member.
- Designed and maintained the Nhost CLI from scratch.
- Contributed to all of Nhost stack, including front-end SDKs, auth and storage.
- Handled design, development, testing, documentation and deployment.

Oversight.in - Founder & CEO | 16 Months | [Link](#)

Stack: Nuxt.js, Golang, GraphQL, AWS (EC2, RDS, ELB), Razorpay (payments).

- CMS for research collaboration to allows scientists, faculties and students to collaborate on each other's research through mentorship, internships or professional collaboration.
- Crowdfund on your research or generate monthly income from your followers.

InstantPost, Bangalore | 12 Months

Stack: Python, Headless Servers, Docker, LXC, Ubuntu, RHEL, OpenSSH.

- Automated remote servers across India for a production-ready edge-computing environment. Handling load balancing, health monitoring, fault tolerance, auto-scaling of services and secure server-to-server connections.
- Technical writer for all the innovations and developments within the company.

PERSONAL PROJECTS

Pragyaan.co | [Link](#)

Stack: Nuxt.js, Golang, GraphQL (Hasura), Vercel, Razorpay (payments).

Event hosting and ticket collection platform for educational trainings, workshops, webinars, etc.

Hydra | [Link](#)

Stack: Python, Shell Scripts, Wireshark, Scapy, Kali (OS), OpenSSH.

Designed an advanced high security, low latency anonymous data routing mechanism on the network patching the logical vulnerabilities of existing anonymous routing designs.

OPEN SOURCE CONTRIBUTIONS

Google Summer of Code 2019 | [Link](#)

International Neuro-informatics Coordination Facility (INCF), Germany Node.

Nhost CLI | [Link](#)

I continue to solve issues, make pull-requests on Nhost's CLI repository.

PATENTS

Hydra | Under Examination

Modern resilient anonymous network routing protocol for enhanced security, reduced latency by overcoming the shortfalls of the infamous Onion Router (TOR).
